Laravel, Jquery, Bootstrap, Tailwindcss,  
Linux and other plugins and libraries.

## HOBBIES

Code, Traveling, Drawing

## PROFILE

I began my journey in web development by self-studying since 2023. Then I joined a class and I got my first job at Myanmar Software Integrated Solution Co.ltd,.(MSIS). I have got hands-on experience with over a year at junior level, primarily building laravel-based applications. That time not only strengthened my technical skills but also sparked a deep passion for clean code, thoughtful architecture, and delivering real value through every project.

## WORK EXPERIENCE

### Content Management System (CMS)

I contributed over 7 projects that contain this key features.

- Responsive UI
- Page builder with image uploads, rich text editor, and SEO tools
- Role-based access control for editors and admins
- Custom menu and navigation manager
- Multi-language support (Myanmar | English | Chinese)
- Media gallery with reusable assets
- Contact form with email alerts
- and others.

### Service Management System (SMS)

I contributed over 3 projects that contain this key features.

- Role-based access for admins, head, engineers, and requester
- Dynamic permissions
- Multi-auth System – Engineer & Head and Staff & Head
- Admin dashboard with service KPIs and graphs
- Service request form with file attachments and category selection
- File chunking for large file uploads
- Multi-language support (Myanmar | English)
- Excel import and export
- Service and KPI reports export (PDF/Excel)
- API Integration
- Clean, responsive UI using Bootstrap 5
- and others.

### School Management System (SMS)

I contributed over 2 projects that contain this key features.

- Student registration system with Bootstrap tabbed form (multi-section)

- Role-based access control for Admin, Teacher, Student and Guardian
- Staff Roles – Admin, Teachers, Accountants, Librarians, etc., with permissions
- Subject, Class, and Timetable management
- Attendance tracking with per-day/month summary
- Exam result entry and report card generation
- Multi-language support (Myanmar | English)
- Notice board and internal messaging for communication
- Subject Management – Manage subjects per grade/class
- Teacher Profile Management – Subject assignments, schedule, personal details
- and others.

### Other Projects

I also contributed other large projects like goverment’s “CESID”, “Supreme Court-hr”, “OTSMS” and others for

- Updating queries for performance issues
- Reporting (in excel files)
- Debugging server issues
- And others...
